

TOWNMORE

Introduction

Townmore is Ireland's 16th largest Contractor with a turnover in excess of €60m and a team of over 100 professionals and craftsmen. The Controlled Environment Division was specifically established to serve many of our repeat clients whom operate in production, research & development in controlled environments.

This company division has been resourced to focus on delivering high-performance space using innovative solutions to ensure that our clients can continue to perform and grow to their requirements. Projects are approached in a partnership, collaborative fashion, ensuring synergy between client, design team and delivery team alike with the end goal being the provision of highly successful projects.

Service Offering

Our primary service offering is to provide solutions to our clients needs, particularly in a fast-paced, ever changing environment. We manage the Architectural, Mechanical, Electrical and Process functions from concept through to design, delivery, handover and maintenance. We work with our clients to create bespoke and valuable ideas.

These services can be summarised as:

- Cleanroom Architectural Design & Installation
- Containment Architectural Design & Installation
- Mechanical HVAC Design & Installation
- Electrical Design & Installation
- Structural Design & Installation
- Project Supervisor Construction Stage
- Project Supervisor Design Process
- Specialist Equipment Design & Manufacture

Resource Offering

Our resource offering, solely committed to this division, have exceptional experience in the delivery of controlled environments, from Design Concept, through to Detailed Design, Procurement, Construction, Handover and Maintenance.

Our team is led by Finbarr Marrett, one of Ireland's most experienced cleanroom engineers with an unparalleled understanding of innovative solutions and has worked with many of the world's largest Clients in this sector. Finbarr is supported by a team of experienced professionals in Services Coordination, Engineering, Project Management, Planning, Commercial Management and Administration.

This committed team is supported by a company staff offering of over 100, with offices in Dublin, Cork, London and Tullamore servicing projects across Ireland and the United Kingdom.

Supply Chain

Throughout the past decade, we have worked tirelessly to create a strong, performance driven supply chain. The Controlled Environment Division has an isolated Supply Chain of experienced subcontractors in the delivery of clean space. These subcontractors have been audited for compliance with health & safety, financial and waste management adherence amongst other key performance indicators. Each subcontractor is only allowed access to our controlled environment projects on the back of numerous reference checks.
